CAREER OBJECTIVE

Java Developer with 3+ years of experience in an international company. Developed and maintained Spring backend in an Agile team. Gained direct experience in resolving client issues: collaborated with support teams, promptly fixed bugs, and implemented new functionality based on user needs. Understand how code impacts the end-user. Ready to join your project, quickly get up to speed, and work effectively within your processes.

PROFESSIONAL SKILLS

Technical Skills (Hard Skills)

Programming Languages & Core:

- Java (Java 8/11, JDK)
- Object-Oriented Programming (OOP) & Design Patterns
- SOLID principles, DRY, KISS
- Algorithms and Data Structures
- Frontend (Basic/Working Knowledge): HTML5, CSS3, JavaScript

Frameworks & Libraries:

- Spring Framework: Spring Boot, Spring MVC, Spring Data JPA, Spring Security
- Persistence: Hibernate, JPA
- Testing: JUnit 5, TestNG, Mockito, Postman
- Build Tools: Maven, Gradle

Databases & Data Stores:

- SQL & Database Design
- Relational: MySQL, Oracle DB

Architecture & APIs:

- RESTful API Design & Development
- Message Brokers: ActiveMQ

Cloud & DevOps:

- Cloud Platforms: AWS, Azure, Google Cloud Platform (basic knowledge)
- Containers & Orchestration: Docker, Kubernetes (K8s), Rancher
- CI/CD: Jenkins, GitLab CI/CD,

Professional Skills (Soft Skills)

- Problem-Solving & Analytical Thinking
- Teamwork & Collaboration
- Effective Communication
- Adaptability & Willingness to Learn
- Time Management & Meeting Deadlines
- Attention to Detail
- Understanding of Business Requirements

EDUCATION

**Bachelor's Degree in
Information Technology and
control, 2021**

**Belarusian State University of
Informatics and Radioelectronics**

JOB DUTIES

- Java Developer, 2021 – 2025
EPAM Systems (Minsk, Belarus)
- Served as a member in the Implementation Team, providing post-deployment support by collaborating directly with clients and QA to diagnose, prioritize, and resolve production issues, which enhanced system stability and improved client satisfaction.
 - Actively contributed to the core product development within the Product Team, designing and implementing new features from technical specification to deployment, with a strong focus on writing clean code.
 - Managed application versioning and participated in release processes, ensuring smooth production deployments.
 - Mentored junior and new developers through code reviews, pair programming sessions, and knowledge-sharing meetings, facilitating their onboarding and accelerating team integration.
 - Collaborated effectively within cross-functional Agile/Scrum teams, translating business requirements into actionable technical tasks and consistently delivering high-quality features within sprint deadlines.
 - Enhanced long-term software reliability by proactively identifying and fixing bugs and expanding test coverage through a robust suite of automated unit and integration tests.
 - Integrated with various third-party services and legacy systems (payment gateways, messaging queues, external APIs), handling authentication, error handling, and data synchronization.
 - Containerized applications using Docker(Rancher) and gained experience with container orchestration tools (Kubernetes) for development and deployment environments.
